Office Action Summary

Art Unit: 2839

The filing of an RCE in this case is acknowledged. A first action follows.

Claims 95-106 and 112 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 95, line 6 "the card body" seems incorrect. Claim 112 dependency appears incorrect.

~~Claims 86, 93, 102, 114 are rejected under 35 USC 112, 1st paragraph. While applicant may be his or her own lexicographer, a term in a claim may not be given a meaning repugnant to the usual meaning of that term. See *In re Hill*, 161 F.2d 367, 73 USPQ 482 (CCPA 1947). The term "86, 93, 102, 114 are" in claim 1. These claims are not based on enabling disclosure and just how they are readable on elected embodiments, figs. 22-25 is unclear is used by the claim to mean " " while the accepted meaning is " "~~

Claims 80-116 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aldous '404 in view of Hardesty, Clarke and Research Disclosure (RD).

See Aldous, figs. 7, 8 card body 46, 40 and receptacle assembly 48. It would have been obvious to form assembly 48 as a unitary housing including parts 52, 50 in view of Hardesty. Clarke and RD.

The fig. 7 assembly 48 is basically an adapter. The formation of adapters as unitary bodies like that of RD is well known in the art and the use of such structure would not have been ~~an~~ unobvious.

Art Unit: 2839

For fig. 8, it would have been obvious to use an adapter like 48 but appropriately formed for use with cavity 36 and used for addition of circuit parts or for change of plug in direction as in RD, figs. 1, 2. Claim 95 "dimensions....differs" as broadly stated does not overcome use of RD type adapter.

For claims 85, 92 etc, it would have been obvious to use an adapter to provide recesses for plural telephone plugs or lines in view of Clarke and Hardesty.

This basis of rejection is maintained since no new results have been shown to be derived from use of plural lines in a computer card body. If such results are present they should be discussed in the response.

Any inquiry concerning this communication should be directed to N. Abrams at telephone number (703) 308-1729.
